

ATTITUDES TOWARDS LGBTI+ RIGHTS AND ISSUES IN NORTH MACEDONIA

June 2021

METHODOLOGY

Data collection period	27th November to 21st December 2020
Location	Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia, Serbia
Target populations	Citizens 18+
Method of data collection	CATI (Computer-assisted telephone survey), in combination with CAWI (Computer-assisted web interviewing) used with population 18-44 years old, hard to reach with CATI method. Percentage of interviews realized with CAWI: 9% in Albania, 10% in Montenegro, 7% in North Macedonia, 20% in Bosnia and Herzegovina and Serbia each. In Kosovo only the CATI method was used.
Sampling frame	CATI: Electronic Telephone Directory; CAWI: IPSOS on-line panel database
Type of sample and method of selection	CATI: Two stage stratified representative sample with quota method of respondents' selection. Strata: Officially defined regions with countries within countries, and types of settlements (urban / other) Primary sampling units: households (simple random sampling) Secondary sampling units: respondent within household (quota based on gender and age) CAWI: Quota sample - respondent (quota based on region, type of settlement, gender, and age)
Poststratification	By gender, age, region and type of settlement (correction by level of education)
Sample size	Total 6284; Albania 1014; Bosnia and Herzegovina 1015; Kosovo 1225; Montenegro 1008; North Macedonia 1017; Serbia 1005
Sampling error	±3.33% - lower bound of marginal error country-wise

Cells of the table are colored in black, or orange, if values they contain are considerably above or below average. Three shades of black or orange color are used for three degrees of significance, the lightest shades for deviations significant on the level 0.10, medium shades for the level 0.05 and the darkest shades of black and orange for the level 0.01.

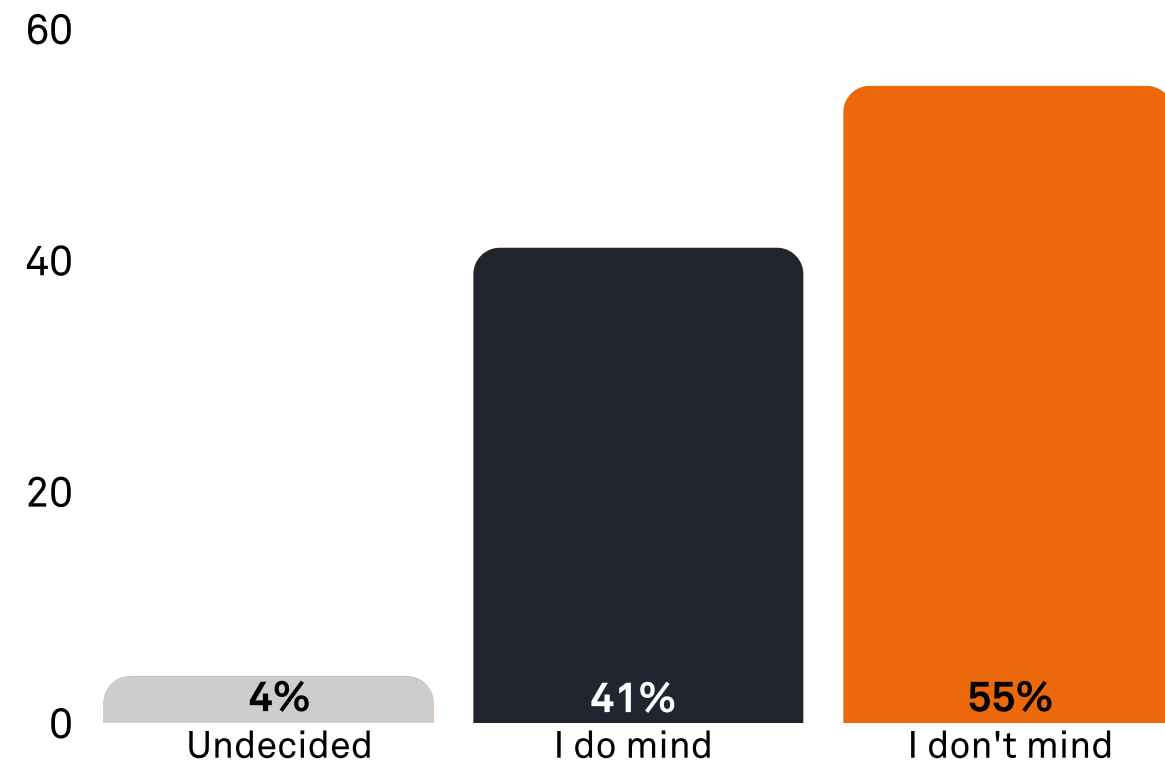

DEMOGRAPHY

Do you agree that LGBTI+ persons should have the right to peacefully walk through Skopje?
